GAS TODAY

-The safest & simplest free cooking gas

What is "GASTODAY"?

GASTODAY is an equipment that produces cooking gas from leftover food/vegetable/organic waste through the process of anaerobic bacterial digestion. In simple terms, the organic waste is degraded biologically, and biogas which is produced as output, is used for cooking.

Why "GASTODAY" ?

Today there is an increased need for alternate energy and waste management. "GASTODAY" has a gateway to address both. By using "GASTODAY" you can produce your cooking fuel, organic manure and also save the environment from pollution!

Components

① Food Waste Inlet

③ Biogas Outlet

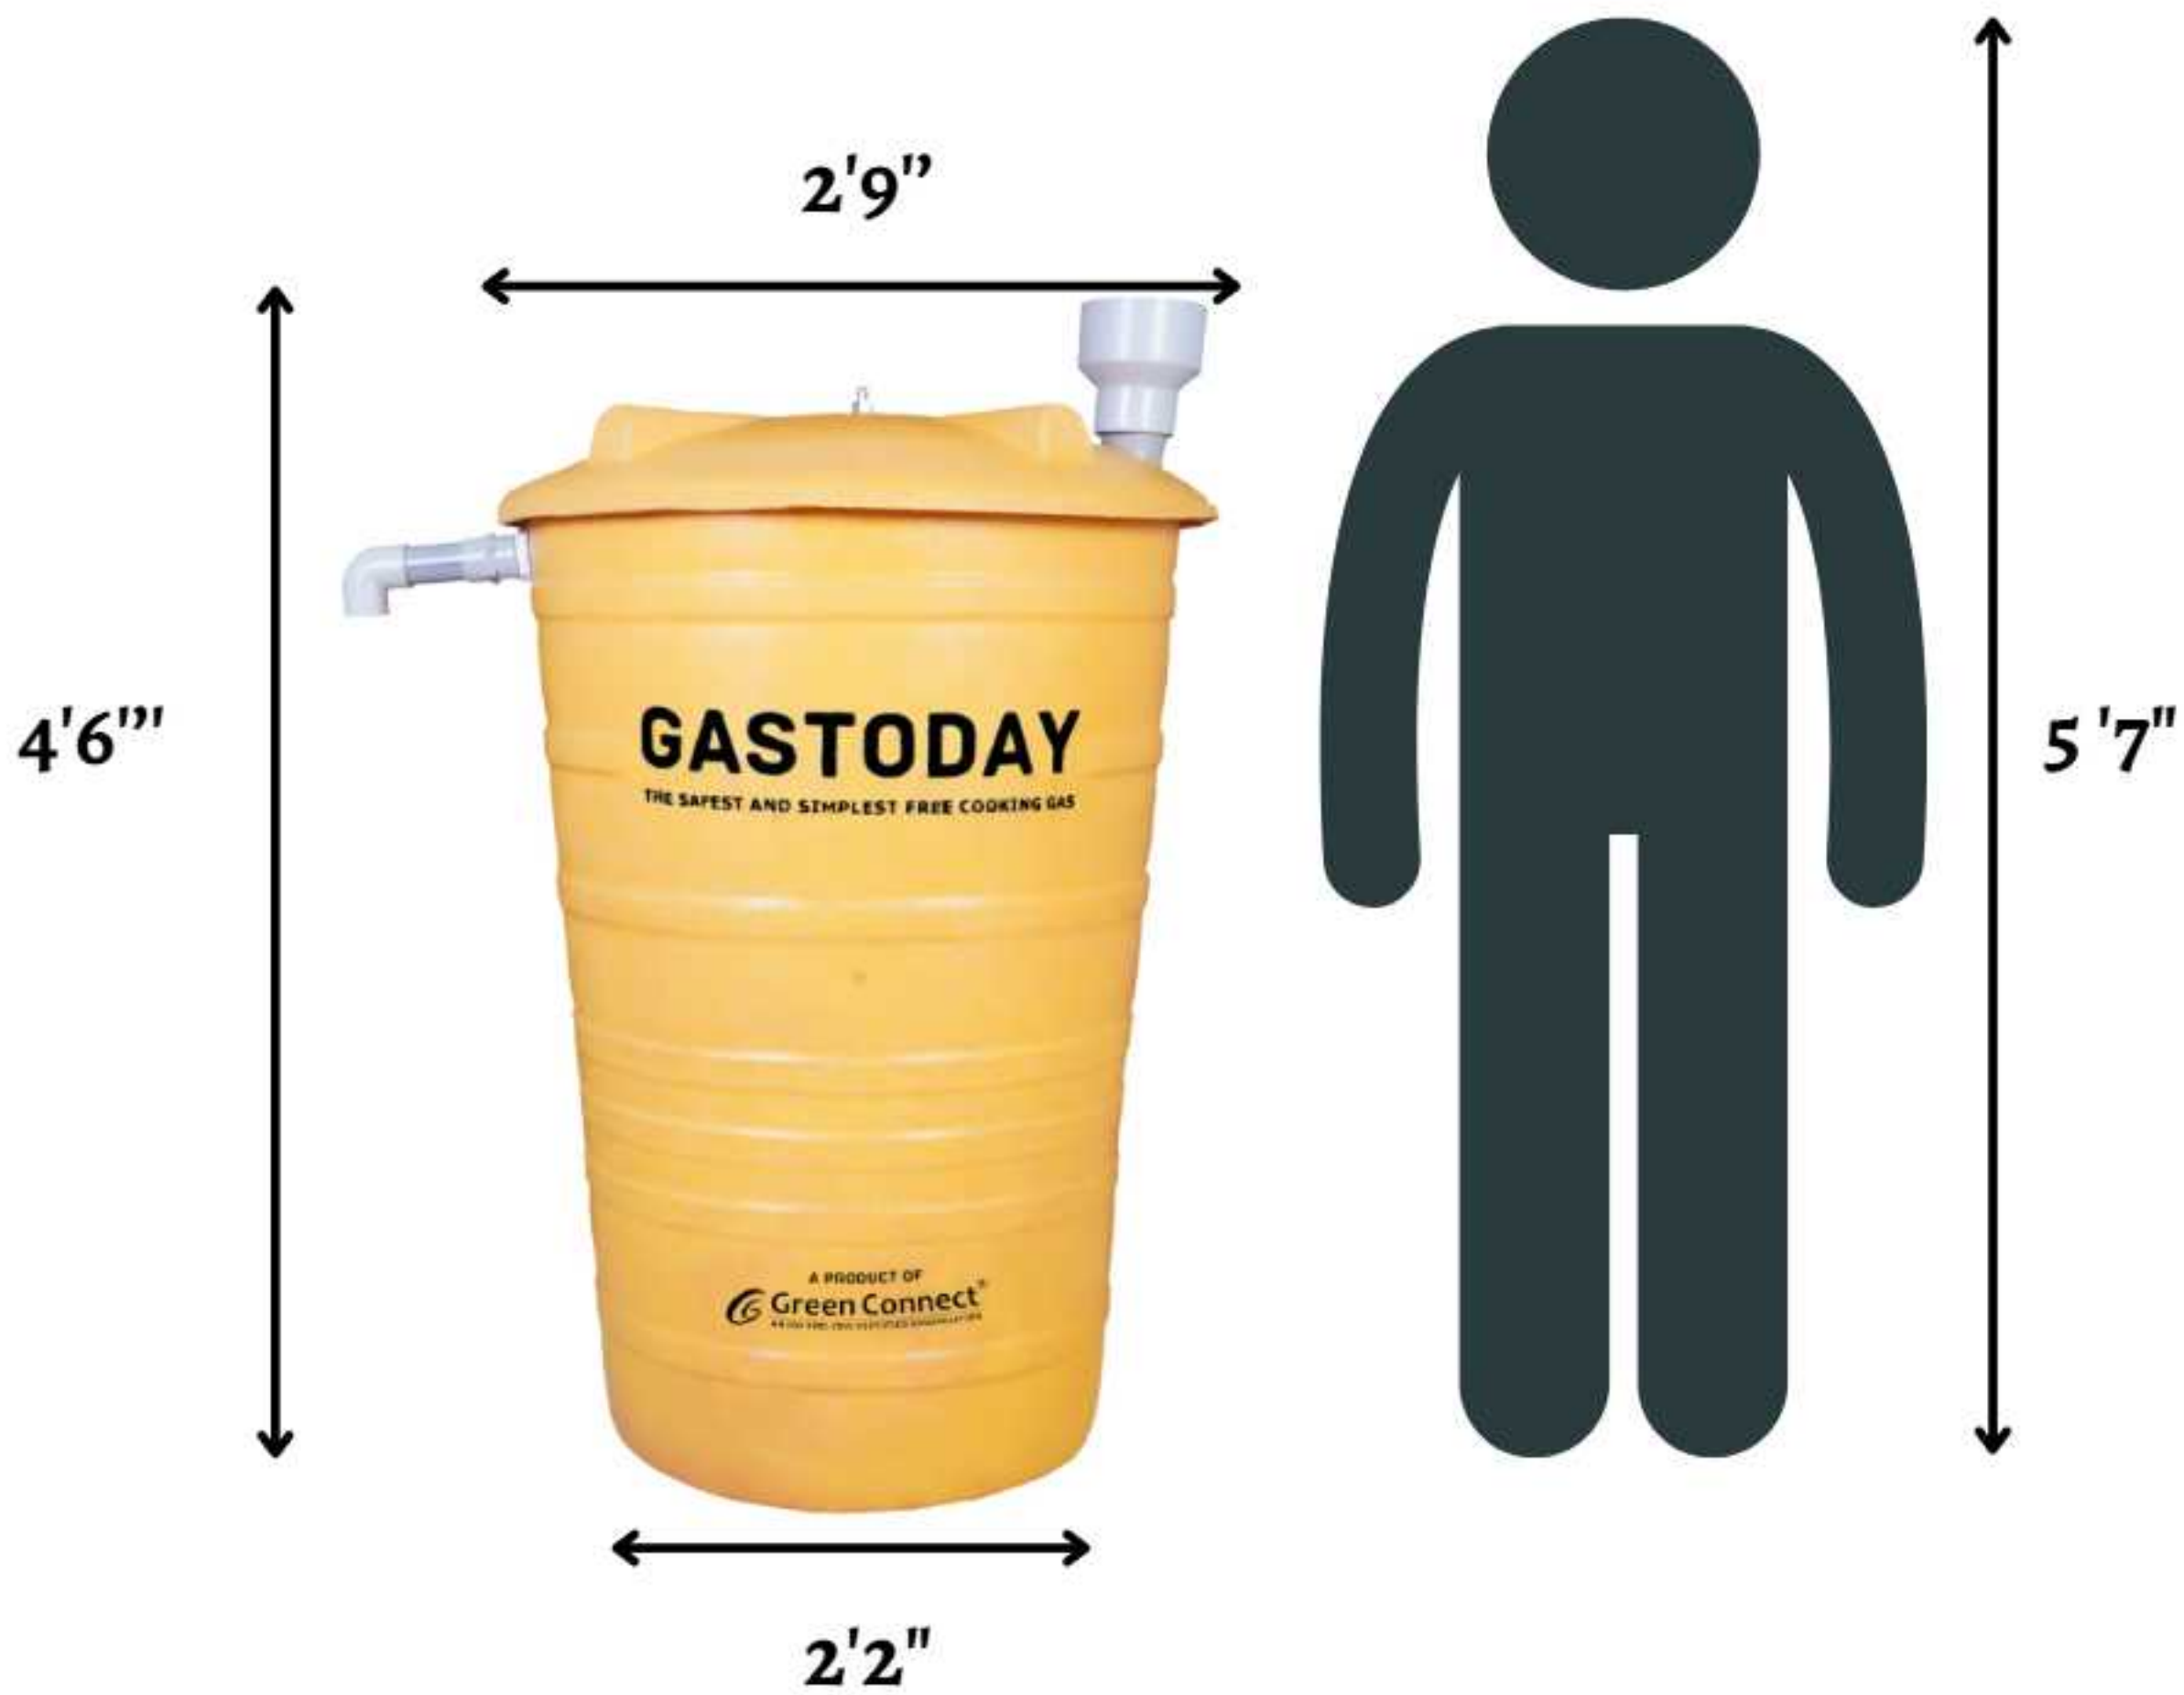

⑤ Biogas Stove

② Digester

④ Biogas Line

⑥ Manure Outlet

Specifications

- Maximum Height – 4 feet 6 inches
- Maximum Diameter – 2 feet 9 inches

Production Table

Waste Fed per day	Gas Produced per day	Usage Time per day	Manure Produced per day
2 Kg	200 liter	60 minutes	5 liter

Note

- All the data given are maximum production and usage capacity of the equipment per day
- The cooking gas production varies according to the quantity & quality of the food waste

Product Features

Proven technology

The product is 100% tested for gas production and works with anaerobic digestion technology

Odor free gas

Unlike input waste, the biogas produced doesn't have any smell

Durable Material

The equipment is made using FRP with UV resistant, which is highly durable

Safe

The product is highly safe from explosion since the excessive gas escapes

Compact

The equipment is compact, so it can fit easily into narrow spaces in your home

Portable

The product can be shifted anywhere according to the requirement

Quick cooking

The product ensures better gas flow than conventional methods, speeding up the cooking process.

Mosquito Free

The product is fully enclosed, preventing any possibility of mosquito breeding

Suitable Locations

Terrace

Balcony

Garden

Outside Kitchen

Personal Benefits

Free cooking gas

Free organic manure

No electricity required

Organic wastes
that can be
fed inside
